

2010 CHRISTIAN HERITAGE CONFERENCE

Vendor Workshops

Friday 12:15-1:00 P.M.

Mango Math Group

Jill Minifie • Auditorium B

MANGO is more than just a tasty fruit! MANGO Math Group provides educators and parents with K-5 math games and activities that promote mathematical thinking, confidence, communication and build a deeper understanding of mathematical concepts. Come and see how our K-5 math activities will supplement your math curriculum, and join us as we nurture young math minds.

Nutrition 101: Choose Life!

Growing Healthy Homes

Michelle Dunlap, ND • Auditorium C

Michele Dunlap, ND, will present an overview of the groundbreaking curriculum Nutrition 101: Choose Life! From publisher Growing Healthy Homes. Learn how this program is helping families understand how food – good and bad – affects them. Biblically based and packed with hands-on activities, science and art projects and nearly 80 family-friendly recipes, this program teaches and reinforces the why's of what we should eat. Containing a complete reference guide filled with nutrition facts, charts, practical tips and an exhaustive index, Nutrition 101: Choose Life! serves as a constant resource for improved health and abundant living. Pick up tips on how to get even the pickiest of eaters to eat healthy food and love it.

Experience Excellence in Writing

Excellence in Writing

Julie Walker • Room D

Come and discover award-winning Excellence in Writing, a method of teaching composition that really works. Using this program, students of all ages will learn to write stories, reports, and essays with style. This workshop will give you an overview of the program and show you how you can get started.

Raising Kids Who Love to Learn

Sonlight Curriculum

Karla Cook • Room E

Success in education is best measured by a love of learning. But how do you create students who love to learn? By inspiring them with great literature, biographies, and living books! Come learn from a 12-year homeschool veteran how to use great books to create eager learners. Award-winning Sonlight Curriculum builds family bonds and equips students to think.

Bible First Family Ministries

Becky Develle • Room G

Don't reserve the Bible for Bible-study. Come learn how to simply and practically use Biblical reasoning skills for all subjects from history to math. Teach your children to take every thought captive to Christ, like the noble Bereans. The Bible contains solutions for educating our children's hearts and minds, and is the only solution for turning our country back to God.

2010 CHRISTIAN HERITAGE CONFERENCE

Vendor Workshops (continued)

Saturday 11:45-12:30 P.M.

Real Learning Using Real-Life Methods

Math on the Level

Carlita Boyles • Auditorium B

In this workshop, we will explore how real-life teaching techniques encourage real learning much better than conventional, one-size-fits-all workbook approaches to math. Come discover how to help your children understand what is being taught and retain what they have learned, without busywork, in ways that are both effective and fun.

Brain Power: Food for Thought

Growing Healthy Homes

Michelle Dunlap, ND • Auditorium C

Learning and cognitive development are directly affected by good and bad brain foods. What are good and bad foods and how do they really help or harm the brain? Michele Dunlap, ND, will provide an overview of unit one in the ground-breaking curriculum Nutrition 101: Choose Life! from publisher Growing Healthy Homes. Biblically based and packed with hands-on activities, science and art projects and nearly 80 family-friendly recipes, this program teaches and reinforces the why's of what we should eat. Containing a complete reference guide filled with nutrition facts, charts, practical tips and an exhaustive index, Nutrition 101: Choose Life! will serve as a constant resource for improved health and abundant living.

Integrating Language Arts with Literature

Total Language Plus

Barabar Blakey • Room E

The benefits of integrating subjects are numerous. With literature as the basis of your language arts studies you can build an integrated study incorporating vocabulary, spelling, grammar, comprehension, and writing assignments. Learn how to study these subjects in a practical way avoiding "busy work".

Finally, discover how such an approach to studying language arts will help to develop critical thinking in your students.

The Deer in the Headlight

Bedrock Distribution LLC

Nancy Radke • Room G

A theme gives your lessons focus and keeps your units together. In this workshop we will examine the power of a theme to guide a lesson. We will help you come up with themes appropriate for your children. A theme makes it easier to come up with object lessons, practical applications, and visuals. We will spend time exploring how to think up object lessons, practical applications, and visuals to enhance your lessons.
